# We preserve our audiovisual heritage

Video Tapes

Analog Cassettes

Audio Tapes

Digital Cassettes

Films

## We scan your current heritage

- Whatever your original media, we suggest (offer) you to scan the contents
- A digital copy allows :
  1. To preserve forever the content in its current form
  2. Better keep the original by keeping it in the appropriate environment, protected from exploitation
- Our team repair and restore your physical 16mm and 35 mm films, etc.
- Our reading machines and cleaning process optimize your tapes and cassettes
- Scanning our system generate the best possible quality
- Once scanned, your audiovisual heritage is easier to preserve
  1. The original physical media can be (may be) archived environment adapted (The original physical media can be archived suitable environment)
  2. Digital copy can be used and copied at will (whenever you want)

## We store your digital content

- We store your scanned on secure media content. (we store your scanned media content to secure)  
According to your need, we will use
  1. Dedicated servers or shared drives
  2. Or computer tapes (LTO)
- In any case, a double security tape is made to deal with any eventuality
- And you receive a copy to keep carefully

## We manage the repository of your new items

- We provide you with the deposit you (r) new items.
- Whenever a new asset should be added to your collection, just let us entrust
- You and your partner may file
- We create digital copy archiving format which was decided
- We record in a database with metadata.
- We manage, create for you the deposit and relaunching applicants if necessary
- Are you sure your archive is healthy?

- Regularly, you will receive a cartridge with new items

## **We validate the technical quality of your assets**

- We check your files according to your criteria (needs).
- We validate interoperability.
- You are certain they will be used by most of the tools available

## **We regularly check your backups**

- We control the quality backups of your assets.
- These copies are made or required every 5 to guarantee the best conditions of preservations for the recorded data
- You will receive a new copy for you to keep carefully.

# **You easily value with our services**

## **Access your assets wherever you are**

- The posting of a low-resolution version of your heritage archive opens a whole field of possibilities
- You can see where you are. Everything is always up to date.
- You know the status of collections and the progress that is being treatment
- You can listen, view and show your assets (in "browsing" quality).

## **Enrich your database**

- The data base to archive your heritage is a key to your success.
- You can view and enrich it with all the required information.
- Technical information, transfer credits and attached rights can be added by anyone who has the rights delegation.
- Your employees, your partners can look for items from the registered database data.
- We can offer you several innovative services with real added to enrich the metadata of your assets. See the back of this brochure.

## **Manage access rights to your collections**

- Your heritage is alive but access must be regulated
- The rights of those your employees and your partners that you give access will not have the same rights
- Together, we organize and you can manage them.

## Order your work

- As you value your assets, you need to transfer document version or customers in a specific format to one or more of your partners
- **Simply select the media concerned and the work order. We realize**

Authoring

Cassette

USB

Duplication

PAD

VOD

## Use suitable operating interfaces

- To fully utilize your media, you may need interfaces specialized. This is the case for example to fully exploit the media sports associations.
- We then offer specialized interfaces tailored to your needs

## Connect your archive with your website

- If you have an intranet or website, you can link to our portal
- Then you will benefit from the power of our servers
- You do not have to manage your media. Interoperability will be ensured

# Other recovery services AV Heritage

## Calibration

- The colors of the scanner are not recovered more generally the original colors as dandruff age
- The colors of the scanner is not more recovered generally the original colors as dandruff age
- Our calibrators and senior calibrators offer this benefit. Trust them to make your content their original colors compatible with modern uses

## Digital restoration

- All media age, In fact, content copied from old media have also scratches, dust, scratches, the drops, etc...
- Depending on the quality of the original materials, depending on the quality of work scanning and depending on your use, you may have restored some of your content.
- Our specialists offer their talents. They have the best facilities to restore your old quality elements

## Subtitling and Audio Description

To better promote your items, you will need to improve their accessibility. Vectracom offers two techniques in which are leading;

1. Subtitling for the hearing impaired. It can be prepared in the media language or in another language. In this case, we can take care of the translation. To improve just improve indexing your content, a simple statement of dialogue is sufficient
2. The audio description for the visually impaired
3. Statements dialogues or subtitles are excellent metadata that increase the visibility of your heritage elements

## Cataloguing and Indexing

- We will achieve a more or less thorough technical cataloging according to your requirements
- You can inform yourself the database, with remote editorial information, credits and rights
- From your usual workstation without special software, connection to our accommodation online, you hear and see your media and catalog your assets with all the necessary information
- We can help you in achieving this task
- You only have to validate
